POSITIONS IN THE PROTEOMICS CORE FACILITY

Selected individuals will be in charge of directing OUR PROTEOMICS FACILITY. Candidates are expected to have extensive expertise in the field of interest. Experience in MALDI-TOFF AND ION TRAP MASS SPECTROMETRY TECHNOLOGIES are required. There are no nationality restrictions. Salaries will be commensurate with qualifications and experience. Positions are available immediately.

Applications should include a letter of intent, curriculum vitae, and three reference letters. Deadline for applications: June, 2005.

The Centro de Investigación del Cáncer (CIC) is a cancer research institute located on the biomedical campus of the University of Salamanca, Spain. The CIC contains 20 independent research laboratories and state-of-the-art facilities such as multiarray cDNA technology, proteomics, transgenesis, and a tumor bank. The CIC includes groups engaged in basic, clinical, and translational research on cancer whose activities are evaluated periodically by an outside Scientific Committee. In addition, the CIC is located adjacent to the University Hospital and the Life Sciences Departments of the University of Salamanca to enhance the interaction among basic and clinical researchers. Further details about the CIC goals, research avenues, and facilities can be found in our web page.
